

e-STATION Program

Install Guide

(Windows XP)

This software is an application program to monitor the operation of e-STATION chargers. It is self-instructive and easy to use for who are using e-STATION charger. This software needs a serial number and a key of its own to be operated normally.

Any commercial reproduction or copy of this program is strictly prohibited

System requirement

CPU : Intel Pentium 3 or above

RAM : Minimum 512MB

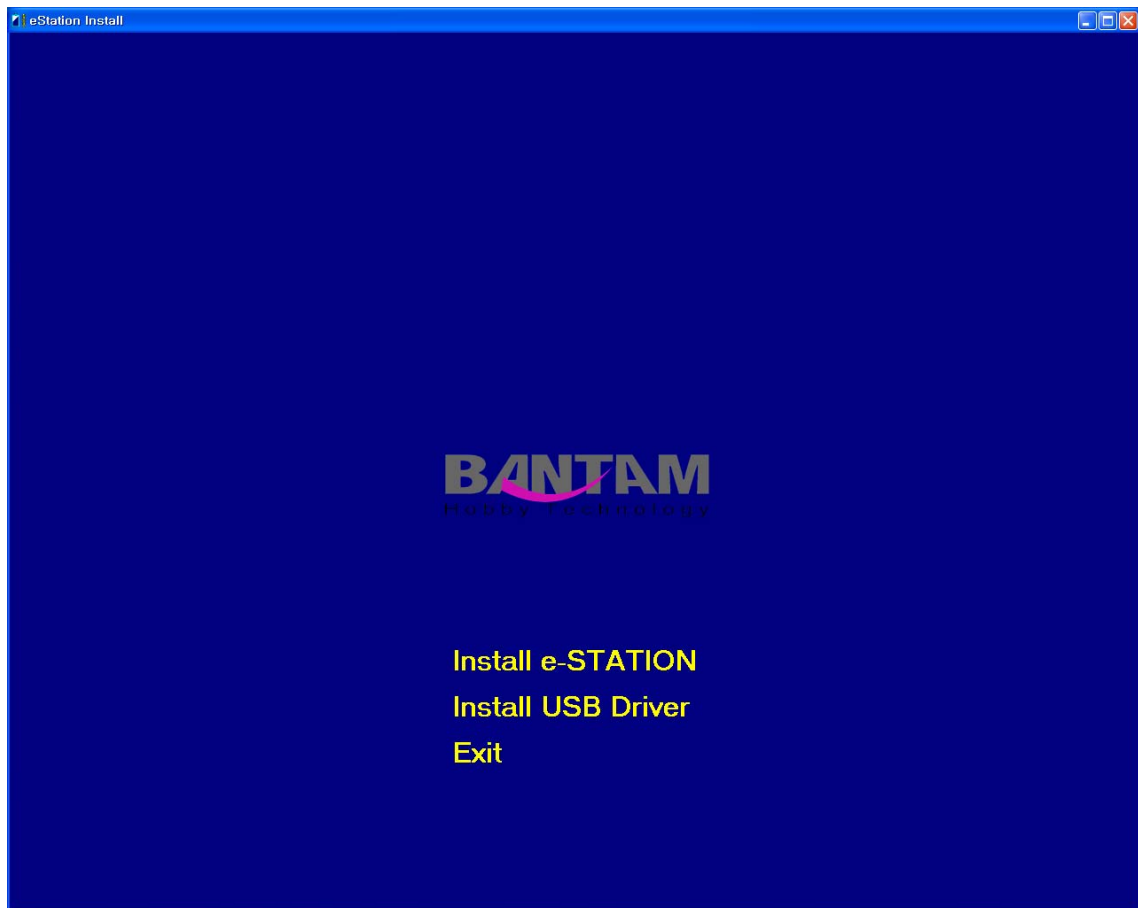

Disk space : Approximately 5GB including the data storage space

VGA : True Color, 1024*768 or higher resolution

Operating System : Windows 2000, WindowsXP (32/64bit), Windows Vista (32/64bit)

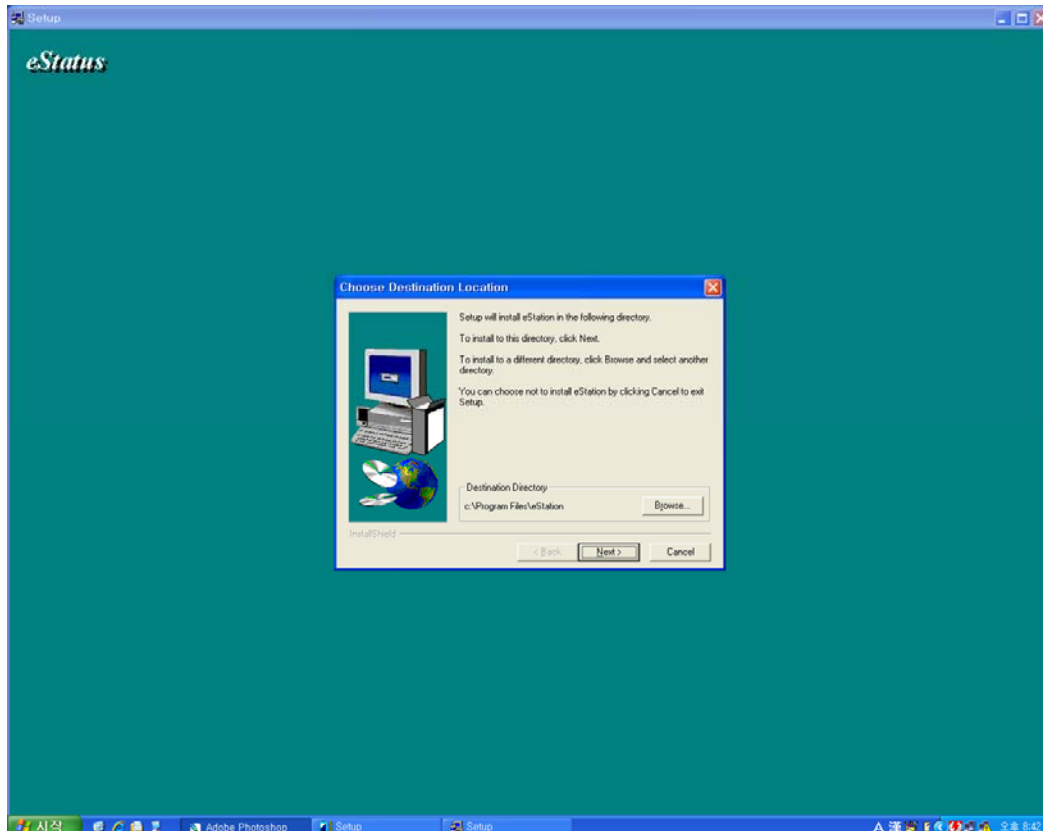

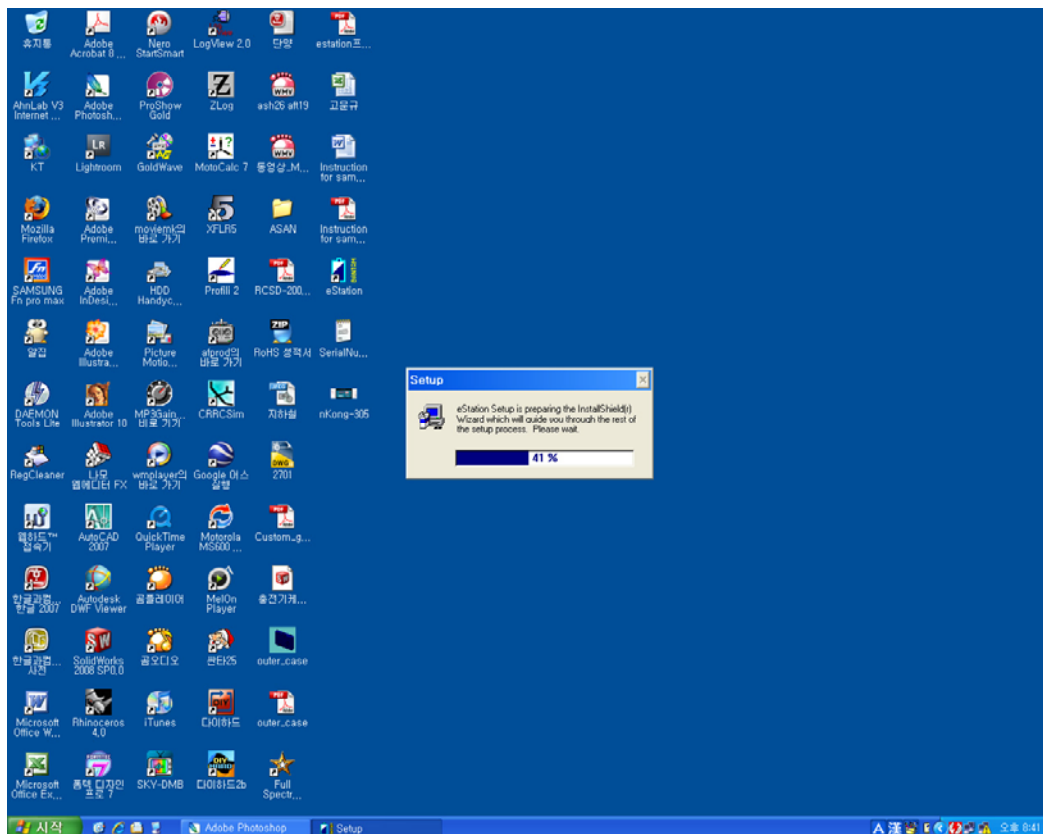

1) Insert CD to CD-ROM drive.

The install program will start automatically. If it does not start, you may execute 'Setup.exe' in 'Setup' directory manually.

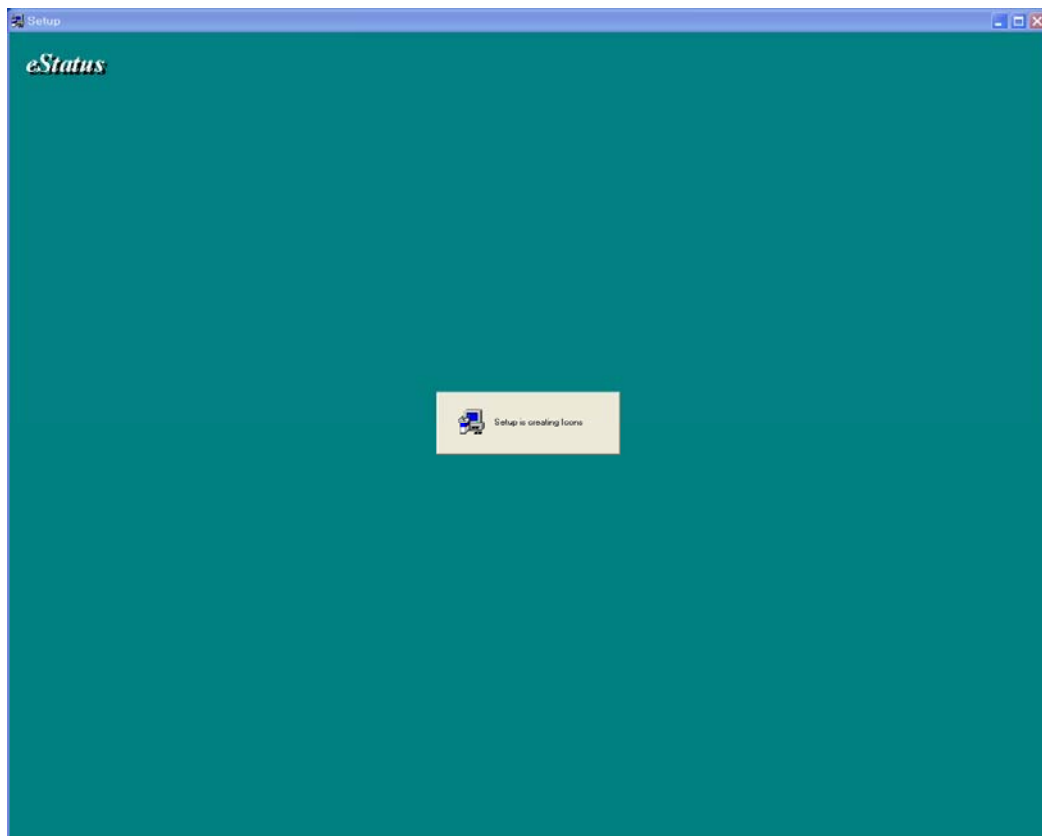

2) Install e-STATION program

Click 'Install e-STATION' to start to install the program.

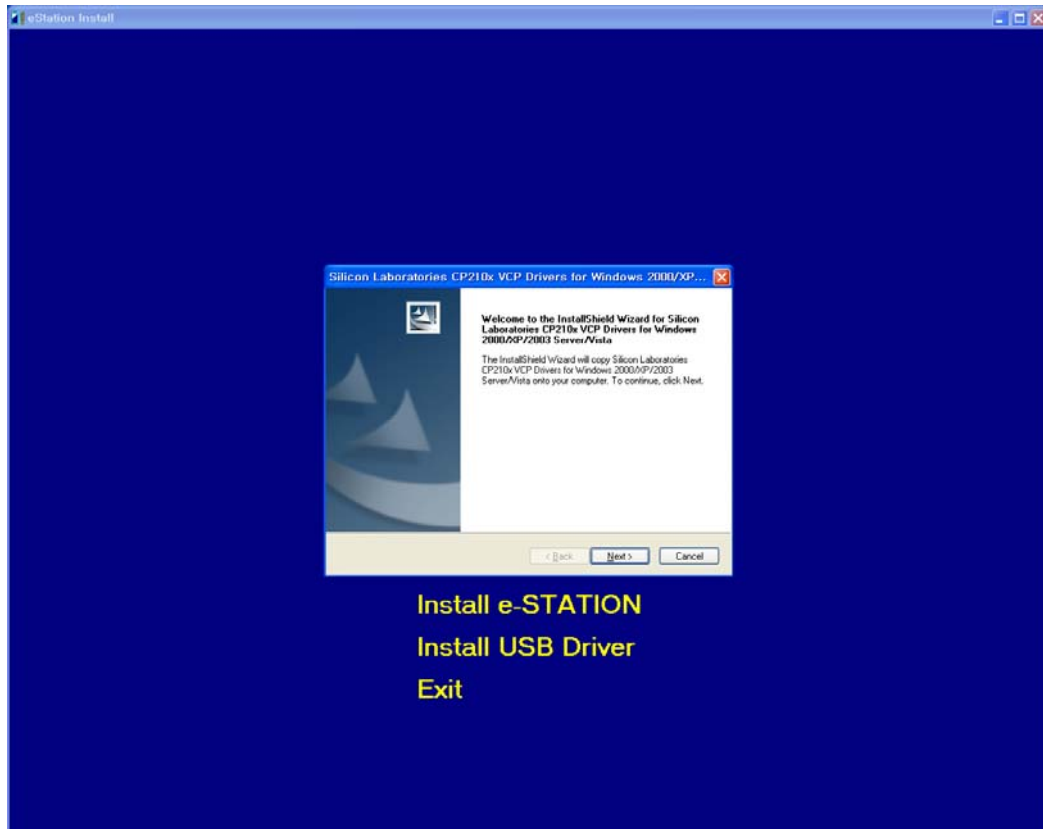

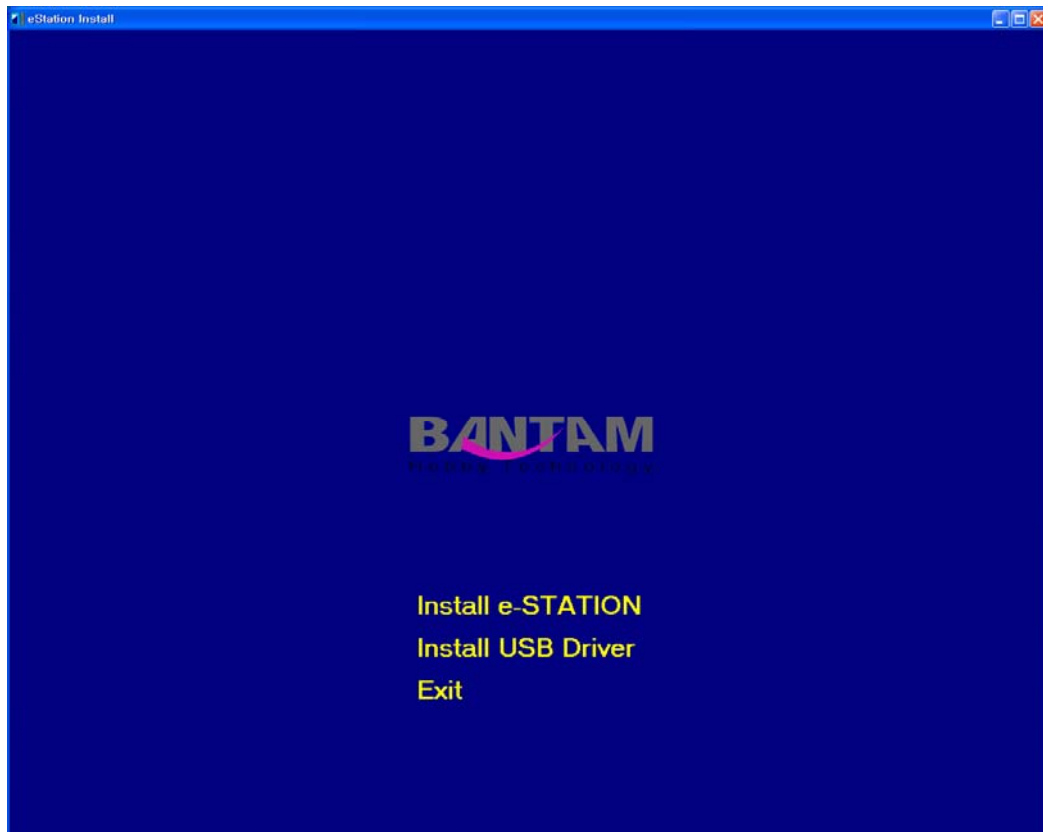

Set the destination directory at storage device. You can change the destination, but we recommend the default directory.

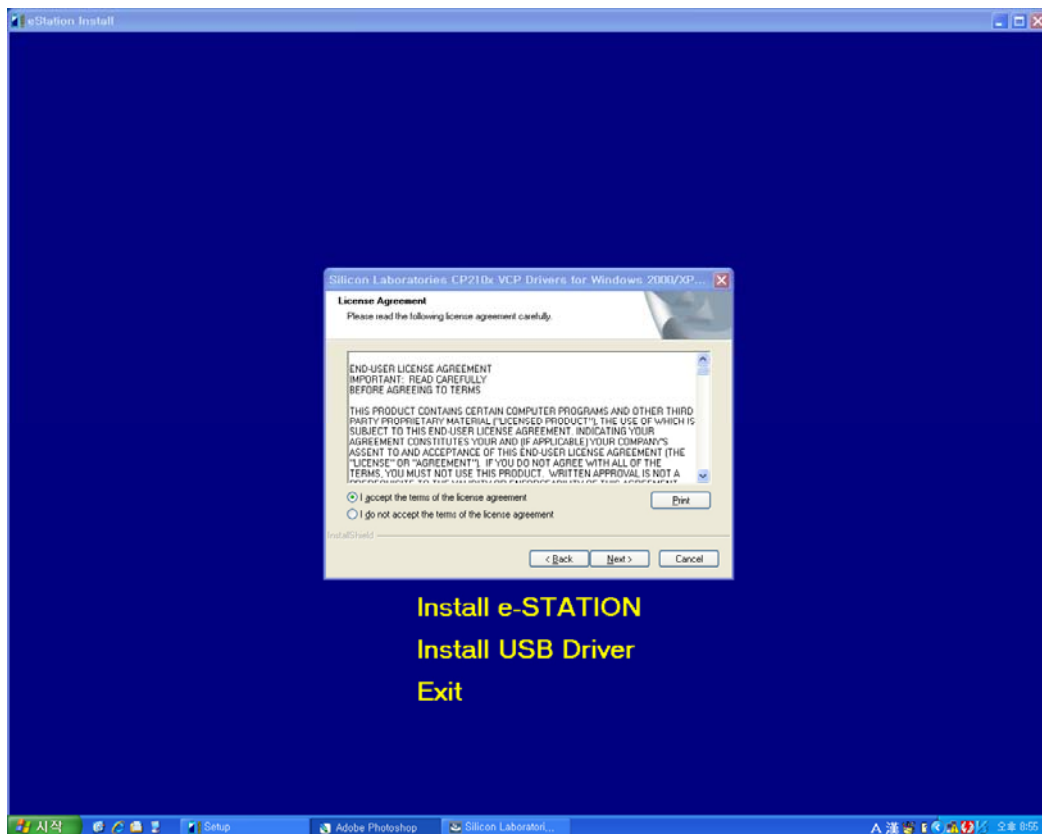

Install program is creating the program icon at desktop and will be finished.

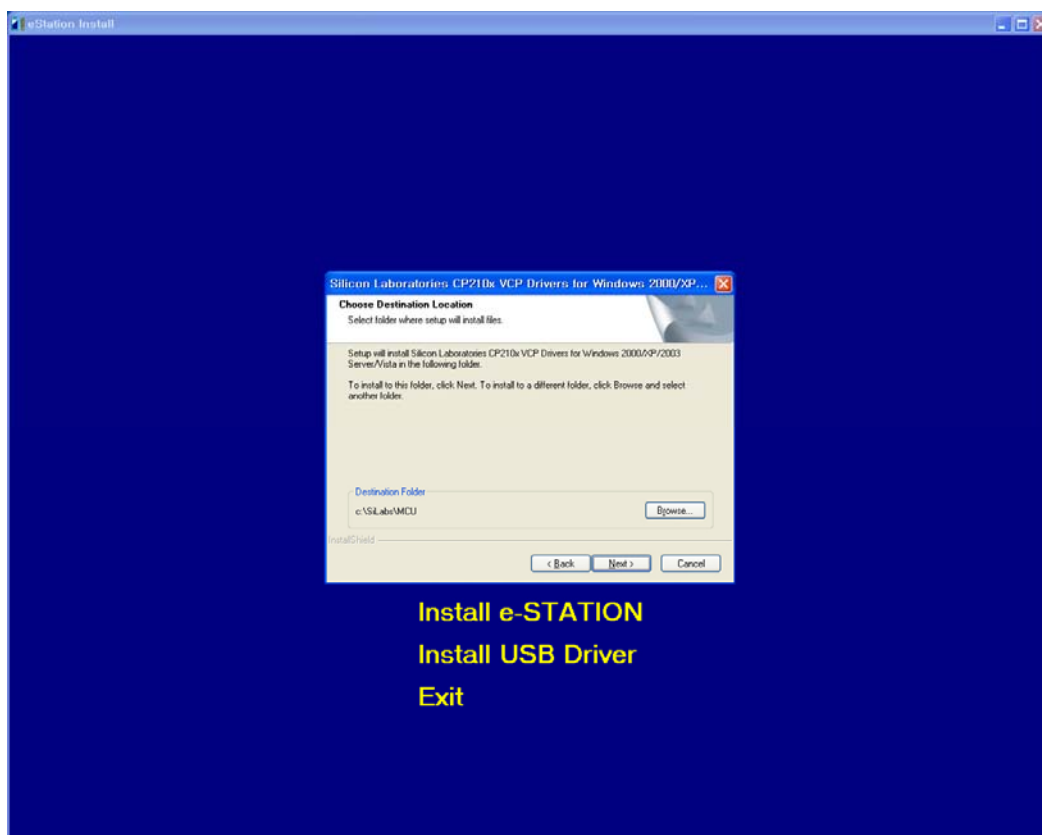

- 3) Install USB driver files for communication with charger.
Click 'Install USB Driver' to start to install the files.

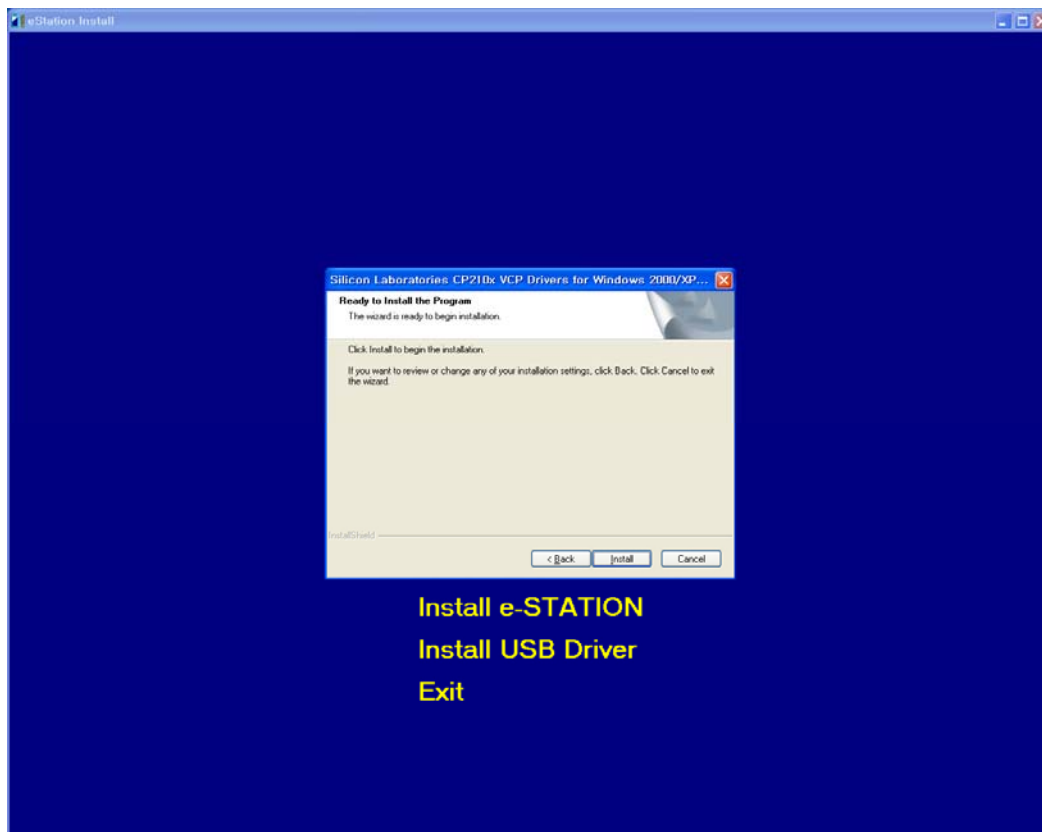

Click 'Next'.

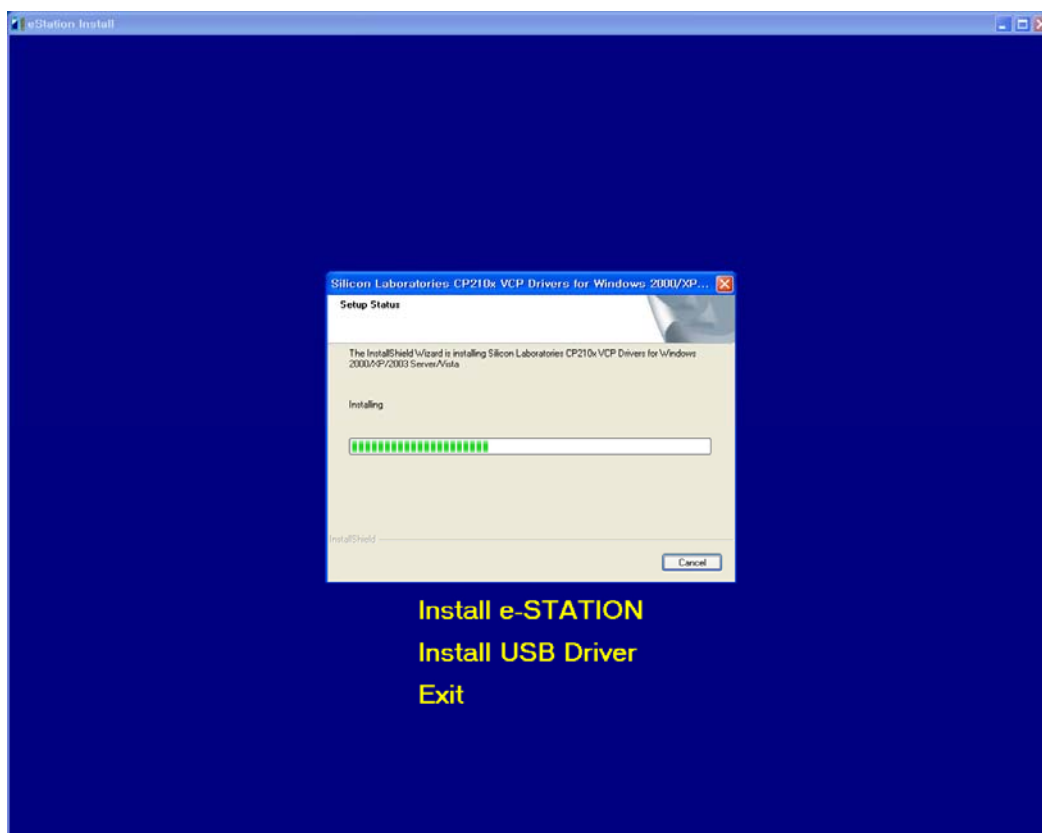

Check 'I accept the', and click 'Next'.

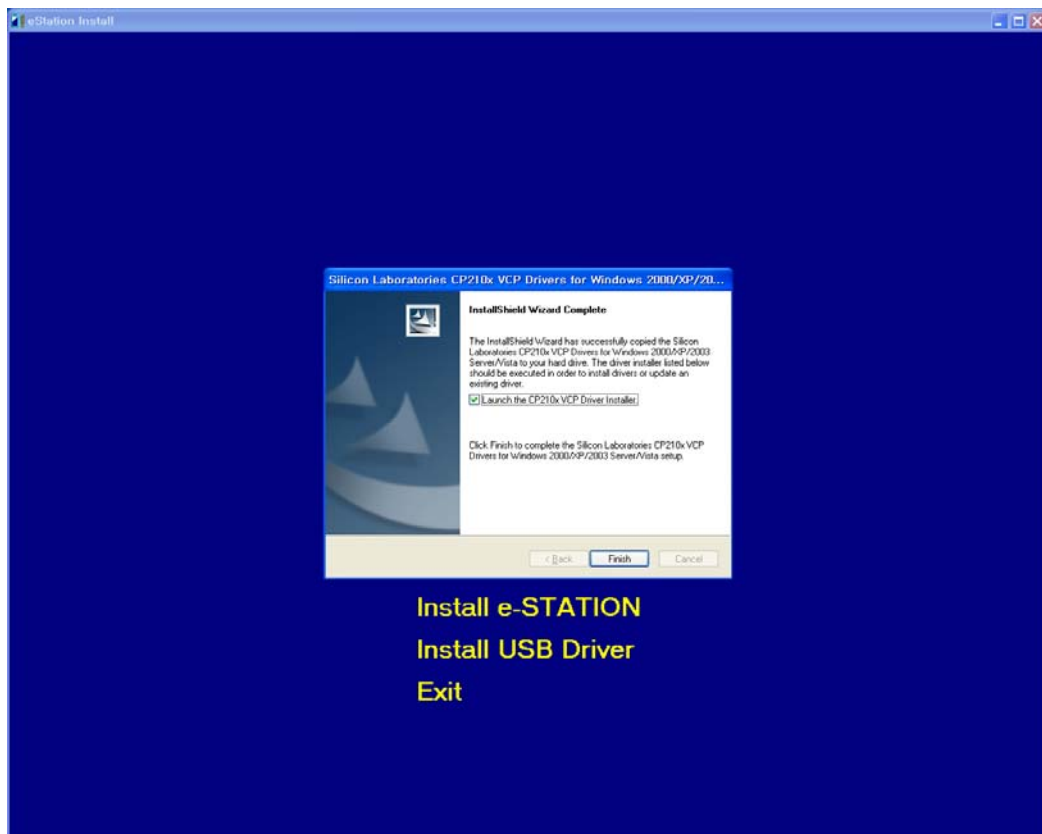

Click 'Next' to accept the directory to install USB driver files.

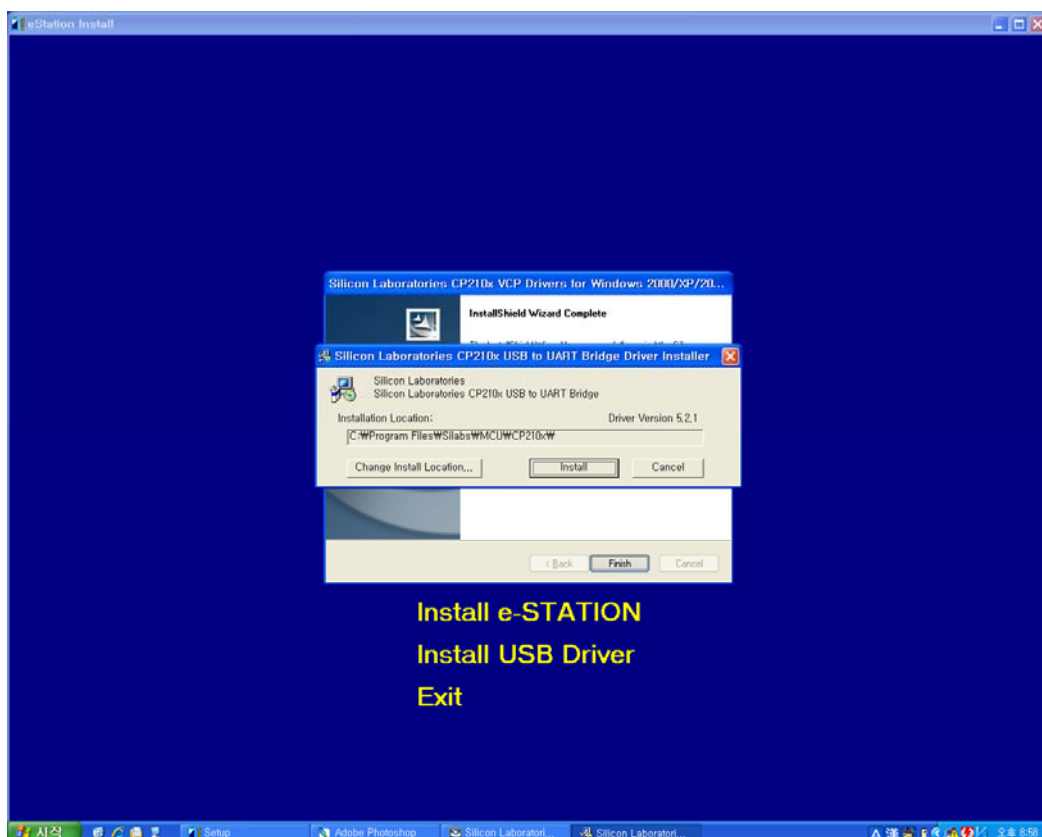

Click 'Install' to start to install the files.

Check 'Launch the CP210x...', and click 'Finish'.

Click 'Install', the install program will be finished after installing all USB driver files.

4) Restart PC

You have to restart PC to make USB driver files to be activated, after finishing the install program.

5) Executing the program

You can start the program by double-clicking the program icon at desktop or execute 'eStation.exe' at the directory where the software installed. If the setup procedure is completed successfully, you can find the short-cut icon of the program at desktop. When you execute the program for the first time, you need to input activate key and serial number which are supplied with CD. Look in the file 'SerialNumber.txt' at root directory of CD.
