

## VEXplorer Wheel Kit

This kit contains two of the wheels custom designed for the VEXplorer. These high traction wheels will roll smoothly across almost any surface. They're not just for drivetrains though, try using them as rollers for robot mechanisms, or on the end of an arm to help your robot climb things.

These wheels are 2.85" in diameter, and 1" thick. They have a 1/8" square center hole to transfer torque, which makes them compatible with all Vex square-axles, and motion components.

Vexplorer Wheel  
(2x)

**Limited 90-day Warranty**

This product is warranted by Innovation First against manufacturing defects in material and workmanship under normal use for ninety (90) days from the date of purchase from authorized Innovation First dealers. For complete warranty details and exclusions, check with your dealer.
